PROFESSIONAL SUMMARY

Analytical professional with over 10 years of experience in structured legal analysis, risk-based decision-making, and translating complex, multi-stakeholder requirements into structured outcomes within regulated, high-stakes institutional environments. Currently formalizing the transition to legal technology, combining deep legal expertise with hands-on training in data analytics, web development, and AI tools. Complementary knowledge in cybersecurity, including threat landscape analysis, cloud security concepts, Governance, Risk & Compliance (GRC), GDPR, and digital risk management, adds a critical layer for responsibly deploying AI in environments where data sensitivity and regulatory accountability are paramount. Practiced at the intersection of legal reasoning and security thinking, turning ambiguity into defensible, structured clarity. Eager to bridge the gap between legal practitioners and AI-powered solutions, translating complex workflows into scalable, high-impact tools that deliver measurable value across regulated environments.

CORE SKILLS

GOVERNANCE, RISK & COMPLIANCE

Risk assessment | GRC frameworks | GDPR compliance | Information security principles | Regulatory compliance | Audit-ready documentation | Sensitive data handling | Access control concepts (IAM) | Identifying security vulnerabilities | Threat landscape fundamentals | Cloud security concepts | Analytical thinking | Structured problem-solving

TECHNICAL

Python | SQL | PowerShell | JavaScript | Node.js | Git & GitHub | Power BI | REST API design | JWT authentication | Postman

PROFESSIONAL

Stakeholder communication | Cross-functional collaboration | Process documentation | Independent work | Initiative | Attention to detail | Multi-tasking under structured governance

AI TOOLS

Claude & Claude Code (daily driver, research synthesis, backend development) | ChatGPT & Gemini (research, comparison, everyday reasoning) | Copilot (code, documents, email)

EXPERIENCE

Support Worker , Københavns Kommune

11/2024 – 05/2025 | Copenhagen, Denmark

Gathered requirements from multiple stakeholders (families, healthcare specialists, and municipal teams) and translated them into structured action plans and documentation that different teams could follow. Identified bottlenecks in case workflows and proposed process adjustments that reduced delays between departments. Maintained complete, traceable records across concurrent cases with strict confidentiality standards.

Disability Support Worker , Olivia Danmark

01/2024 – 06/2025 | Copenhagen, Denmark

Managed competing priorities across multiple parallel relationships, ensuring clear communication and reliable documentation across stakeholder networks. Adapted plans in response to changing conditions while maintaining continuity and accuracy, translating competing priorities into documented workflows that a diverse stakeholder network could follow.

Senior Judicial Officer , Court for the Execution of Sentences

07/2022 – 06/2023 | Ibagué, Colombia

Managed information flow and business procedures across a high-volume, regulated institutional environment with multiple internal and external stakeholders. Coordinated cross-institutional follow-up between judicial units, public agencies, and external partners under strict procedural deadlines and governance requirements. Identified process inefficiencies and recommended structural improvements that enhanced information integrity and reduced operational friction.

Judge , Municipal Criminal Court

09/2018 – 07/2022 | Ibagué, Colombia

Led structured decision-making processes involving multiple stakeholders with opposing interests and non-negotiable constraints, under conditions where execution quality, governance, and personal integrity were all equally non-negotiable. Produced structured written decisions that translated complex, multi-source information into clear, defensible, and traceable outcomes. Identified systemic process vulnerabilities and implemented structural improvements that increased operational efficiency across the court. Managed confidential information across a multi-institutional network with complete accountability.

Legal Assistant & Administrative Roles , Judicial Branch

02/2012 – 09/2018 | Ibagué, Colombia

Provided administrative and coordination support across regulated proceedings involving multiple institutional stakeholders. Contributed to the rollout of new digital case management systems, supporting data migration and training stakeholders to improve data handling accuracy and process reliability across a complex institutional environment.

KEY ACHIEVEMENTS

Co-author "Korruption i Danmark 2000–2024" at Transparency International

2025 | Denmark

Top national rank: Colombia's competitive judicial selection exams

2014 and 2018 | Colombia

Research published: Revista Internacional de Direito Ambiental, Vol. 1, No. 2

2012 | Brazil

EDUCATION & TRAINING

TECHNOLOGY & PROFESSIONAL DEVELOPMENT

Web Development – Back-End Track , Hack Your Future	2026 Denmark
Cybersecurity Fundamentals , ReDI School of Digital Integration	2026 Denmark
Data Analytics , ReDI School of Digital Integration	2025 Denmark
Front-End Development , ReDI School of Digital Integration	2025 Denmark
Introduction to the Threat Landscape 3.0 , Fortinet Training Institute	2025
Cybersecurity Fundamentals , IBM SkillsBuild	2025
Learning GDPR , LinkedIn Learning	2025

ACADEMIC CREDENTIALS

Master of Criminal and Criminological Sciences , Universidad Externado de Colombia	2017 Colombia
Bachelor of Laws (LL.B.) , Universidad de Ibagué	2013 Colombia
Research Semester in Environmental Law , Universidade de Aracruz	2011 Brazil

PROJECTS

Easy Bloom — Plant Care Platform (Final Project) 🔗 , Hack Your Future	2026
Final capstone project built with a team of four and presented at Microsoft. Owned backend authentication and security: user registration and login, password hashing with bcrypt, JWT-based session management with 7-day token expiry, and rate limiting on login (5 failed attempts per 15 minutes) to prevent brute-force attacks. Built the PostgreSQL schema with Knex migrations, the REST API with Express.js, and full Swagger/OpenAPI documentation. Integrated the PlantBook API for plant search and care data through a dedicated service layer, keeping external integration logic separate from route handlers. Deployed backend and frontend to Render.	
Brewed With Love — Full-Stack Coffee Shop 🔗 , Hack Your Future	2026
Team back-end project building a complete shopping cart API, from design to deployment. Defined the data model, endpoints, and TypeScript types for the team. Built the API layer with Express.js: route handling, input validation middleware, and consistent error responses across all endpoints. Connected a React frontend to the real backend API. Deployed both services independently on Render with environment-specific CORS configuration. Implemented concurrent write protection using a mutex to prevent data corruption under simultaneous requests.	
Events Startup — Ticketing Platform Back-End 🔗 , Hack Your Future	2026
Solo back-end project building a complete ticketing platform API from a Product Requirements Document through deployment. Translated business constraints into technical architecture: PostgreSQL schema with ERD, REST API with Express.js, JWT authentication, transactional checkout logic, and comprehensive Swagger/OpenAPI documentation. Managed agile delivery via weekly Trello backlogs and iterative mentor review. The complete cycle from requirements to deployed solution, managed end-to-end.	
Frog Hunter — Full-Stack JavaScript Game 🔗 , Hack Your Future	2026
Collaborative project built across defined sprint cycles using Trello 🔗 for backlog management. Organized requirements into sprint-scoped deliverables, tracked progress, and released iterative versions. Agile ceremonies in practice: sprint planning, backlog refinement, and iterative releases as the actual working method.	
AI & the Judiciary — Research & Editorial Project 🔗	2026
Independently researched and published a structured analysis of Colombia's first Constitutional Court ruling on AI use in judicial proceedings (T-323/2024), synthesizing frameworks from UNESCO, the Council of Europe CEPEJ guidelines, and the EU AI Act. Explored generative AI tools throughout: using ChatGPT and Claude to synthesize technical standards, cross-reference complex legal frameworks, and enhance research velocity. Hands-on experience in GenAI process integration applied to structured analytical work.	
Employee Insights — Data Analytics , ReDI School of Digital Integration	2025
Transformed a raw employee salary dataset into actionable insights using Python (pandas, matplotlib) and Power BI. Built structured data pipelines, documented methodology for reproducibility, and translated findings into clear visual summaries for non-technical audiences.	

VOLUNTEERING

Volunteer Project Coordinator 🔗 , AXIS NGO	02/2026 – Present Copenhagen, Denmark
Support planning and coordination across team projects, tracking tasks, managing timelines, and maintaining communication across volunteers, stakeholders, and partners. Contribute to process documentation and operational follow-up in an active, mission-driven environment.	
Prison Visiting Service 🔗 , Danish Red Cross	10/2024 – 04/2025 Copenhagen, Denmark
Researcher 🔗 , Transparency International Denmark	06/2024 – 03/2025 Copenhagen, Denmark
Co-authored the national corruption monitoring report "Korruption i Danmark 2000–2024." Structured document research, analytical synthesis, and coordination with a research team to deliver a published, externally disseminated report within the deadline.
